

Safety Vents - Water Boiler Safety Valves

- This type of valves are used in water boilers to prevent damage due to pressure rise in water supply. By releasing excess pressure system operates in its nominal pressure range.
- Release pressure is factory set to customer's request. Set pressure can not be altered by user.

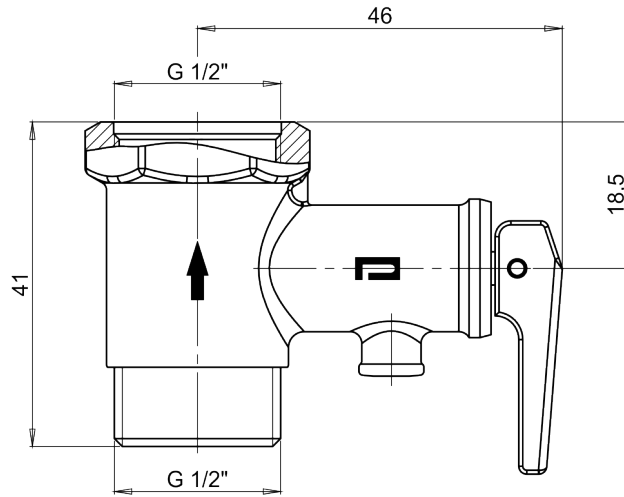

Usage Properties

Fluid Temperature	· 110 °C
Conformity	· CE 0408
Storage Temperature	· -20 ... +60 °C
Max. Pressure	· PN 16

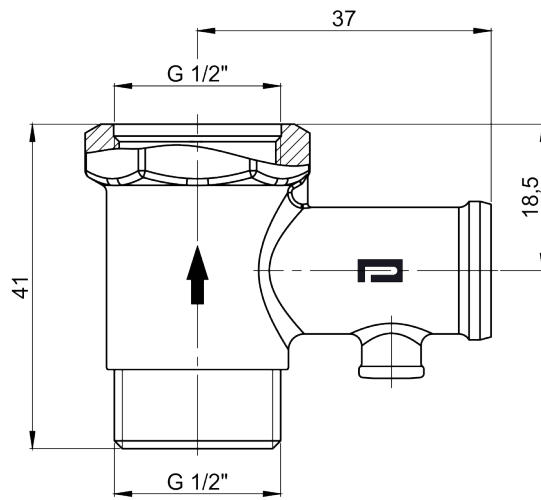

Constructive Properties

Discharge Connection	· G 1/2" B
Material	· Brass - Nickel Plated
Connection	· G 1/2" B
Tension Spring	· Stainless Steel
